Megalosauridae

Megalosauridae sunt familia dinosaurorum priscorum cladi tetanurarum subordinis theropodorum ordinis Saurischiorum, quae a Iurassico Medio ad Inferius vixerunt. Nomen ab Thoma Henrico Huxley, palaeontologo Britannico, anno 1869 excogitatum est.

Torvosaurus

Animalia — Chordata

Classis : Reptilia

Superordo : Dinosauria

Ordo : Saurischia

Subordo : Theropoda

Superfamilia : †Megalosauroidea

Familia : Megalosauridae

Huxley, 1869

Palaeontologia

170–148 m.a.: Iurassicum medium > inferius
